

**Mitigation Monitoring and Reporting Plan (MMRP)**  
**for the**  
**LaTour Demonstration State Forest 2013 Management Plan Update**  
**Initial Study/Mitigated Negative Declaration**  
State Clearinghouse # 2013072027  
**Shasta County, California**

In accordance with CEQA Guidelines Section 15074(d), when adopting a mitigated negative declaration, the lead agency will adopt a Mitigation Monitoring and Reporting Plan (MMRP) that ensures compliance with mitigation measures required for project approval. The Board of Forestry and Fire Protection (Board) is the lead agency for the above-listed project and has developed this MMRP as a part of the final Initial Study/Mitigated Negative Declaration (IS/MND) supporting the project.

This MMRP accomplishes the following:

- 1) Lists the mitigation measures developed in the IS/MND which were designed to reduce environmental impacts to a less-than-significant level.
- 2) Identifies the party responsible for implementing the mitigation measure.
- 3) Defines when the mitigation measure must be implemented.
- 4) Identifies which party or public agency is responsible for ensuring compliance with the measure.

One of the findings of the IS/MND for the 2013 LaTour DSF Management Plan Update was that mitigation is required to reduce potentially significant impacts related to Hazards and Hazardous Materials. Potential significant impacts could occur by accidental spilling of the material. Another finding was that there is the potential for contamination of water bodies by the spread of the fungus *Batrachochytrium dendrobatidis* (Bd) and other diseases into and between water bodies located on LDSF. Mitigations were developed to reduce the potential spread of these diseases.

**Mitigation Measures to Avoid Accidental Spilling:**

**Mitigation Measure 1:** To insure that all hazardous materials are properly used, stored and transported, Material Safety Data Sheets (MSDS), material labels, and any additional handling and emergency instruction of the materials are kept on file at LaTour Demonstration State Forest (LDSF) Headquarters.

**Mitigation Measure 2:** Any state employee handling these materials are made aware of the potential hazards, given proper training and instruction, and also made aware of the location of the MSDS, and any other documentation for the material.

Mitigation Measure 3: All contractors used in the application or use of these hazardous materials shall have the appropriate licenses and be able to read and understand the MSDS, labels, appropriate recommendations and application instructions.

Mitigation Measure 4: The storage of potentially hazardous materials on LDSF is in accordance to the MSDS and any buildings that are used for storage will display appropriate placards.

Mitigation Measures to Prevent the Spread of the Fungus *Batrachochytrium dendrobatidis* (Bd) and Other Diseases into and between water bodies located on LDSF:

Mitigation Measure 5: To prevent the spread of the fungus *Batrachochytrium dendrobatidis* (Bd) and other diseases, all gear used in the water or mud by contractors or permittees (dip nets, waders, booties, boots, calipers, etc.) shall be disinfected before moving from one body of water to another. They shall be disinfected in a 0.1 percent solution of Quat 128 and soak all items for five minutes. The disinfectant shall be disposed of > 100 M from the water on a trail or in thick duff where it is quickly broken down by particulate carbon. In addition, wash hands with a hand sanitizer or replace gloves and rinse equipment after contact with each animal.

Implementation of these mitigation measures will reduce the environmental impacts of the proposed project to a less-than-significant level.

## 2) Responsible Party for Implementing Mitigation Measures

CAL FIRE.

## 3) Schedule

Mitigations for Hazardous Materials: Continuously during periods when potentially hazardous materials are being used.

Mitigations for the fungus *Batrachochytrium dendrobatidis* (Bd) and other diseases: Continuously during any activities conducted by contractors or permittees associated with water bodies.

## 4) Verification of Compliance

Monitoring Party: CAL FIRE.

Initials: DL

Date: 8/20/2013

The Board of Forestry and Fire Protection hereby adopts this MMRP:
