Mr. Matt Dias  
Executive Officer  
California State Board of Forestry and Fire Protection  
P.O. Box 944246  
Sacramento, CA 94244-2460

Dear Mr. Dias,

I am writing to apply for potential appointment to the Effectiveness Monitoring Committee with the California State Board of Forestry and Fire Protection (BOF). After a careful reading of the Effectiveness Monitoring Committee charter and revised Strategic Plan I feel that I can make a positive contribution to the committee. Moreover, the committee goals and objectives are aligned with my current research goals as a research ecologist with the USDA Pacific-Southwest Research Station.

I have over 20 years working as a forest ecologist, fire scientist, and GIS specialist experience within the federal government, academia, and private consulting. I have participated in numerous research studies designed to evaluate and monitor the effects of fire in forest ecosystems in the CONUS, Alaska, Mexico, and Brazil. I have also had extensive experience working directly for the Joint Fire Science Program (JFSP) as a contractor. In that capacity I was the science lead on a large project intended to evaluate and monitor the effects of forestry practices such as fuels treatments. In addition, at the behest of the JFSP I have participated in panels evaluating the potential for funding a variety of research projects.

If appointed to the Effectiveness Monitoring Committee I will work diligently and conscientiously to help the BOF meet their stated goals in developing effectiveness monitoring of the California Forest Practice Rules and other associated laws and regulations.

Sincerely,

STACY A. DRURY  
Research Fire Ecologist  
Pacific Southwest Research Station  
Davis, CA.
