

Discussion of Strategic Plan Themes

November 21, 2016

Dr. Erin Kelly input on Themes:

Potentially need more forestry related Themes.

- 1) Stocking standards - perhaps I am mistaken and this was just geared toward oak woodland restoration, but I'm thinking here of AB 417
- 2) Oak woodland restoration - It would be useful to see whether the rules are being used, but also whether & how oak woodlands respond to treatments, how water uptake changes with restoration, understory composition, regeneration of oaks (vs. conifers), use of fire vs. mechanical thinning vs. both.
